

# Teacher notes

## Note-taking skills

There are several activities in the **myWAY Educator resources** that require students to take notes. For example, in the *Introduction to myWAY* practice they are asked to complete a **Career Chart** when they interview someone about their job.

You may feel that you don't need to pre-teach note-taking skills and that's OK. However, if you do feel you need to pre-teach note-taking skills, or even if your students need a refresher, this resource may help.

The **Note-Taking Skills PowerPoint** is designed to be used before students use the **Career Chart** and the example provided is similar to the kind of information your students will get when they are engaging in the **Career Chart** interviews.

Like all **myWAY Educator resources**, please adapt and use in a way that suits your students.

## Using this PowerPoint

- Stop and check that your students understand the content.
- Stop and encourage your students to discuss the examples provided.

## Scaffolding

NB. This resource has no scaffolding and is text dense.
